

New Version 3.2 of HDS shredder

MUNICH – 18. September 2007 – Miray Software presents the new version 3.2 of the hard disk eraser HDS shredder. Therefor, the broad hardware support was expanded even further. The Free Edition of the tool, which is especially suited for private users, is available for free-of-charge download. HDS shredder 3.2 will be introduced on the SYSTEMS 2007 exposition.

If files are only erased per waste basket or format order the contents are still saved on the medium and can be recovered by third parties. That confidential or private Information can be attained by trespassers easily shows itself in many illustrious examples in the past few years, e.g. with hard disks from ministries, companies, and private persons purchased in auctions at ebay. The economic risk originating from this situation is obvious for companies. But more and more private users attach importance to confidential data, like account data or private photos of digital cameras or camcorders, not being visible for trespassers.

HDS shredder offers a fast and simple possibility for companies as well as private users to delete the contents of hard disks or single partitions safely. Thereby, it offers all important German and international standards of data deletion. HDS shredder is applicable independent of an operation system on all PCs, even without an operating system. It has a definite and simple user interface. The deletion process can be started with only a few mouse clicks. HDS shredder also offers the output of a deletion protocol on a floppy disk.

In the new version not only hard disks are supported, but also portable media, like for example USB sticks, CF-cards and so on. Thereby, fotos of digital cameras and camcorders can be erased on these media. It can erase all kinds of file systems and with a very high deletion speed of up to 90 MB/sec (that is 5.4 GB/sec).

On the occasion of the publication of HDS shredder 3.2 and the presentation of further products Miray Software invites everyone who is interested to the SYSTEMS 2007 exposition to stand 312, hall A2. Further information and free-of-charge guest cards (regular price 35 euros) can be found here: <http://www.miray.de/home/systems2007.html>.
